Using products formulated with hydrogen peroxide is one of the easiest ways to ensure that you provide a safer, healthier, and cleaner environment, without the risk of the toxicity that is sometimes associated with conventional cleaners. By cleaning with products formulated with hydrogen peroxide, you not only protect the health of your employees and the building users, but you also help protect the natural and built environment. Using hydrogen peroxide based products is considered an excellent option for cleaning because of their ability to effectively and successfully break down a stain.
